FABCON ENGINEERING

Our Mission and Mantra

WE HAVE THE POWER TO PROPEL.
WE HAVE THE ZEAL TO EXCEL.
We want to strive to the highest level in order to achieve.

- Superior Craftsmanship
- Enduring Durability
- Aesthetic Beauty
- More Value-for-Money

Our Vision and Values

To instill a CAN DO attitude in all our ventures.
To build ingenuity and create sustainable developments.
To provide and protect.

“We shape our Buildings.
Therefore they shape Us.”

Winston Churchill

AFASCINATING FRONTIER

Fabcon Engineering was founded in 2006 with just a handful of employees. Flash-forward to today and our head count has grown to a fairly large team of individuals passionate helping millions of people to live and work better by offering the best cost effective tailor-made external architectural fabrication work.

We are **TURNKEY SOLUTION PROVIDERS** for **CLADDING, GLAZING, WINDOWS** and **SS RAILINGS** to name a few. We are based out of Kolkata, our first home and have expanded our service and consultation footprint nationwide.

Of late, we have been diversifying into various sectors starting from Housing Complexes, Super Markets, Malls, Govt. Enterprises and are very keen to establish an ongoing relationship with you. We will be honored to offer you **AESTHETIC, COST-EFFECTIVE** solutions for Glazing, Composite Cladding, Stainless Steel Railings, Windows, Shera and Canopy Fabrication work for Commercial & Residential Projects.

Reinterpreting Elegance

Sustainability

We strive for the most sustainable building envelope solutions, not only in terms of materials and manufacture, but in terms of 'designing in' key performance and durability features which enhance the whole-life efficiency and longevity of today's buildings.

Design Support

We offer a full range of design support, working drawing, scheduling and delivery services to not only provide solutions that meet design and performance criteria, but ensure that systems arrive as scheduled and are simple and easy to install.

Adding Value

Concept design

Working from your sketches and preliminary drawings, we have the experience to translate design needs into practical and workable metal fabrication and installation solutions that meet all specification and contractor criteria. We have worked with many leading architects and we understand exactly the specialist contribution required. Our design department can provide typical details or fully realized working illustrations in most compatible formats with architectural requirements.

Facade Systems

From snap-on features to full rainscreen façades, Bailey offers a range of solutions for flat or curved buildings which combine design impact with weather-tight and thermal performance.

AND FABCON IT IS...

Our Cladding Division employs the most modern and advanced machinery including cutting Equipment and roll bending, together with all other important facilities for the fabrication of composite cladding panels. Our Cladding Division is also staffed by a trained team of operators, supervisors and managers with a strong background in all the engineering aspects of the production of high quality composite and non-composite cladding panels. FABCON follows current international standards to achieve the required high quality benchmarks set by modern architectural design trends.

FACADE FABRICATIONS

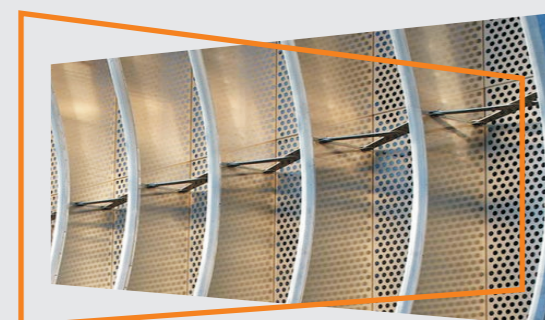

- STRUCTURAL GLAZING
- CURTAIN WALL
- SPIDER GLAZING
- PERFORATION MESH CLADDING
- WPC LOUVER CLADDING
- ACP & HPL CLADDING
- ALUMINIUM LOUVER CLADDING
- DRY CLADDING (STONE, MARBLE & GRANITE)

ALUMINIUM DOORS & WINDOWS

- SLIDING & CASEMENT WINDOW
- SLIDING & HINGED DOORS
- TOP HUNG WINDOWS
- TILT & TURN WINDOWS
- PIVOTED WINDOWS
- SLIDING & FOLDING DOORS

Endless Possibilities

Technical

We offer a full range of technical advice, including technical specification writing, condition reports and budget costings or fully detailed quotations. A comprehensive library of product data sheets and CAD drawings is available along with specifications. For larger projects, and where commissioned, we can carry out roof, eaves or cladding site surveys, as well as wind load and structural calculations. Our Technical Advice department is always committed to respond immediately to specifier and contractor enquiries.

Project management and liaison

Our project management teams are able to liaise with architects, structural engineers and contractors to ensure the streamlined design and installation of our systems. This means we take some of the strain, ensuring that the installation process is always to spec and on time.

Ideas & Innovation

Condition surveys

For refurbishment roofing projects we are able to attend site (subject to location) and carry out a condition survey with recommendations as to the optimal refurb solution.

Return on Investment

Steadily rising energy costs make energy-efficiency a critical concern in any building project. By increasing your facility's energy efficiency and durability, FABCON provides significant cost savings and dramatic returns on investment (ROI), enabling building owners to realize significant reductions in energy bills and long-term maintenance costs.

RDH TOWER - Sector V, Salt Lake

Our Infrastructure

- Strong team of well trained and experienced professionals
 - Good team of Project Managers with formidable experience in the Facade Industry
 - Experienced and dedicated Planners, 3D Artists & Designers
 - Tie-up with leading Facade Consultants for Training and technical design outsourcing
 - Proven Structural Engineers on retainership for facade and architectural engineering
 - Veritable team of Technicians on a contractual basis
-
- Massive & sprawling Factory space with dedicated delivery trucks
 - Gandolas / cradles for onsite staging and fabrication work
 - Dedicated Cranes for glass panel & assembly lifting
 - Imported two part Graco silicone pumps for quality and quick procedures
 - Italian fabrication machinery to facilitate precision craftsmanship
 - Dedicated Italian precision punching machines
